The Value of Telephone Service to the small Shop Keeper

IX HUNDRED THOUSAND telephone calls are made in San Francisco and vicinity each day. A very large proportion of these messages are purchasing orders, or relate to buying or selling. This fact is of vital interest to shopkeepers. It indicates that the telephone system is the great channel through which flows a large part of the City's trade.

Large Shopkeepers are well aware of this fact, and have installed many telephones to serve as inlets for telephone orders. In many cases, telephone trade constitutes a large proportion of their business.

Small Shopkeepers, too, can get telephone trade-providing they have telephones, and give prompt attention to telephone orders. Telephone buying is on the increase, and the shopkeeper without a telephone is left at the post in the race for business.

Copy for the next issue of this Directory will close September 30, 1911, after which date no changes or additions can be made.

Copyright, 1911, by The Pacific Telephone and Telegraph Company.

GENERAL INFORMATION

NON-SUBSCRIBERS.—When it is desired to have a non-subscriber called into one of our public offices at a distant place, a messenger will be sent for at the expense of the party ordering service.

LONG DISTANCE CALLS.—To make connection with other towns, remove the hand telephone from the hook and when operator asks "Number please," say "Long Distance." When the Long Distance operator answers "This is Long Distance" give your telephone number and name and the town, telephone number and name of the party wanted. The operator will make no charge for calling "Long Distance."

(See page XI for Two-Number Toll Service.)

MOVES.—Seven days written notice is required in all cases where the location of a telephone is to be changed. Please fill out "Move Order" on page XV of this book and mail same to the Company.

TELEPHONE NUMBER.—We advise the use of the expression "Telephone Connection" on stationery, wagons, and in advertising, as we may be forced to change your number to meet service requirements.

TELEGRAMS.—Arrangements have been made with the Western Union Telegraph Company under which subscribers of this Company may transmit by telephone to Western Union offices telegrams and cablegrams destined to any part of the world, but this Company does not assume any responsibility for failure to transmit, or for errors in transmission or delivery. To expedite the service, a subscriber desiring to transmit a telegram or cablegram, may call "Telegram" and, unless otherwise directed, the operator will connect him with a receiving station of the Western Union Telegraph Company.

The tolls for the telegrams and cablegrams so transmitted will be charged to the subscriber.

To facilitate the delivery of telegrams, the Western Union Company, when desired, will deliver messages to telephone subscribers by telephone instead of by messenger. The sender of the telegram may indicate that he desires such delivery by omitting the street address and substituting therefor the telephone number of the subscriber addressed.

The Pacific Telephone and Telegraph Company will also continue to send telegrams over its system as heretofore.

'FOR NAMES AND NUMBERS not in book or information regarding change of subscribers' numbers, call "Information."

COMPLAINTS OF SERVICE.—To report telephone out of order, complaints of service, etc., call "Complaint Department."

No rebate of rental allowed until after written notice of 24 hours as provided in contract.

FOR CONTRACTS FOR SERVICE, directory listings, advertising space, etc., call "Contract Department."

TO ADJUST ACCOUNT call "Collection Department."

NICKELS WILL BE REFUNDED by the operator on the following calls:

"Line Busy."

"Don't Answer."

"Long Distance" and

To any Department of the Telephone Company.

Failure to do so should be reported to "Chief Operator" in order that the refund may be made on the next bill.

PUBLIC TELEPHONE PAY STATIONS

SAN JOSE

THE FOLLY OF TWO TELEPHONES

The cities that attempted to secure better telephone service by introducing a competing telephone system are beginning to realize the folly of their course. The opinion prevailed some years ago that two telephone companies would reduce the price and give better telephone service, but it has been learned by experience that it not only doubles the expense to the people, but is an awful nuisance. In some cities these duplicate companies secured franchises under the name of co-operative companies, when a number of people organized and secured privileges under certain representations. They were encouraged in their efforts and the public is today paying the price of its folly with an unsatisfactory double system, no one being quipped "telephonically" without paying for both systems, those not having two being at the disadvantage of not being able to talk to those who are on the other line.—Dayton (Ohio) News.

Some Common Faults of Telephone Service and How to Avoid Them

You probably never realized how many of the common faults of telephone service, as you come in contact with it, are due simply to careless use of the service by the public. Let us give you a few examples to illustrate this:

A number is guessed at, the wrong bell is rung, an innocent subscriber is disturbed, a voice says, "They gave me the wrong number"—and the Company gets the blame.

A bell rings,—it rings again—still no answer. The Operator finally reports, "They do not answer," (note she never says "they are not there") and the connection is taken down. Five seconds later—just six seconds too late—the ring is answered and the tardy subscriber gets "Number please" from an Operator who knows nothing about the call in question as she had nothing to do with it. Upon being told "Why! you just rang my bell!" she can only say what we instruct her to say: "There is no one on your line." She apparently acknowledges the error and again the Company is blamed; especially, when a little later the called party meets the calling party and says she was "right there all the time."

A person steps in and "borrows" the use of a telephone. When through talking he leaves the telephone off the hook, thus keeping the line "busy" and causing a series of busy reports to be made to calling parties. Finally, a clerk, or servant, finds the receiver off and replaces it. Business is resumed and the friend, who has been "trying for fifteen minutes" to get the line blames the Company severely when he is told, truthfully, that "I have been right here all the time and the line hasn't been in use for twenty minutes."

The same thing results when the called for subscriber forgets, or overlooks, the fact that he is sharing a party line with someone else, and that therefore the line might easily have been "busy" all the time and he not know anything about it.

We have no desire to dodge our full responsibility for giving good service. We are not only willing but very anxious to learn all the real troubles of which you have to complain—even those for which we are not directly responsible.

We want this help from you—in the form of accurate detail complaints—and we will help you cure those for which other subscribers are responsible; by printing these pages in our directory; by explaining in any way we can the operation of our system and the reasons for our rules and regulations; also by calling attention to the following simple rules, which, if followed by all will make it easy for us to give, and for you to get, Good Service—which is what we are here for.

REMEMBER THIS

No community ever enjoyed really first class telephone service unless the Telephone Company had the intelligent and hearty co-operation of its

SUBSCRIBERS AND THE PUBLIC

RULES FOR GOOD SERVICE

1. Use the Directory. Never try to remember a telephone number. It's all right if you do remember it; but to try to remember is to begin to guess. If you have the least doubt about it, look it up and thus save time and trouble.

(As a matter of fact, you know, you have no more right to disturb a subscriber by guessing that his number is the one you want than you have to disturb him in any other entirely needless way.)

2. Spell Out all Numbers, by giving each figure separately, as "San Jose, two, five, six, one, for "San Jose 2561"; Santa Clara, two, oh, oh, four," for "Santa Clara 2004."

(The following of this rule is essential to good service. A majority of errors in calls is directly traceable to confusion between "eighteen" and "thirteen," "twenty-three" and "thirty-three," etc., which sound so much alike over the telephone; also to the fact that subscribers do not correct the Operator if she repeats the wrong number.)

- 3. Speak Distinctly, especially when giving the number to the operator, and when talking over a toll line. Talk into the mouth-piece.
- 4. Answer your Bell Promptly. A ring means a friend calling you—don't make him wait, or perhaps miss you entirely.
 - 5. Until your Bell Stops Ringing do not remove the telephone from the hook.
- 6. Be Brief but Courteous to the Operators. We require them to be so to you. They have no time to converse with you; they do not know subscribers' names; they deal entirely with numbers.

Courtesy, like virtue, is its own reward, but pays extra dividends in connection with telephone service. Try it.

- P. S.—By the way, when you know that a false call is due entirely to your careless use of the wrong number, why not acknowledge it to the "innocent bystander" who answers the call? Why leave the Operator to shoulder all the blame?
- 7. Call for "Information" when you can't find the telephone number you want, or to get answers to any questions regarding subscribers' names, numbers or addresses. Your regular Operator cannot answer such questions.
 - 8. Report all Complaints to "Complaint Department."
- To be most effective they should be not only prompt but should describe accurately the trouble encountered. Many forms of trouble look alike at first, and most of them we will not know about till you tell us. If you can't get Exchange at all, call up from a neighbor's or send us a postal card.
- 9. Advertise That You Have a Telephone, but don't put its number on your letter heads, bill heads, cards and wagons. Why? Because this only increases the amount of trying to remember such numbers by the public—also the continued use of obsolete numbers—which in turn only hurts the service and doesn't help your business at all. Think this over.
- 10. Be Reasonable. You always are—yes, of course—but what we mean is this. It is unfortunate—for us—that a telephone subscriber sees nothing, when getting service, but himself and one telephone instrument. He doesn't see the other hundreds or thousands of subscribers and he gets no idea of the work we are really doing and the violent and uncertain changes in the number of calls given us at various hours of the day.

We have Rushes of Business just as the street cars, the stores and the Post Offices do. Yet a man who will patiently wait in line two or three minutes to be allowed to deposit his money in someone's Bank will become "disgusted with such service" if he has to wait in line fifteen seconds to get an Operator to connect him with his residence that he may inform them he "will be a little late to dinner."

It's a Fact. And we think the reason is indicated above. It's human nature, perhaps; but human nature can be improved if one tries, and all we ask is that you try. Ask yourself these questions:

"Does any other company or store in town wait on me so uniformly promptly, or cause me so little direct loss of time, as does the Telephone Company?

"Can I get the services of a street car, a clerk, a sales girl, a cashier, or of any one else nearly as quickly, whenever I want them, as I can those of a Telephone Operator?"

So We Repeat—be reasonable in your complaints, and patient withal, if the Operator is occasionally too busy, waiting on our other customers, to give you instant attention. Meanwhile we will undertake to make your average service prompt and the longer delays reasonably few and far between. When you are not satisfied with it, don't discuss the matter with the Operator, but let our Manager know about it.

11. Observe these Rules if you believe they are good ones. If not, call on our Manager, see our plant in operation, and give him an opportunity to convince you. For we must all work together if we are to have

TWO-NUMBER TOLL SERVICE

Between San Francisco and San Jose, San Mateo, Palo Alto, Redwood City and Santa Clara

NOTICE TO SUBSCRIBERS

The old practice of calling by name and address through "Long Distance" has

been discontinued between points shown on map on opposite page.

Under the new method subscribers will ascertain from the directory, the telephone number desired, and after giving this number to the local exchange operator, will remain at the telephone with receiver at the ear until the called number answers or the operator reports in the same manner as in calling a local number in the same city.

New numbers not listed in the directory, can be obtained by calling "Information

operator."

If the number called for is busy or does not answer, the exchange operator will so notify the calling subscriber but will make a memorandum of the call and make every effort to complete it. As soon as the called number is obtained, the operator will notify the calling subscriber and complete the connection. In such cases it will be unnecessary for the calling subscriber to duplicate or repeat the call as the operator will continue to follow it up until the connection is completed.

If the called number cannot be obtained, the operator will so notify the calling sub-

scriber.

A reduction has been made in the rates to all points to which this service is given. The charge begins on the answer of the called number but none will be made unless the called number answers.

On a call from a nickel telephone, the nickel required to call central will be immediately refunded by the operator. Likewise a call from any other measured service

telephone will not be counted as a local connection.

In all cases, the operator upon completion of the call, will make out a tickel covering the charge from which a bill will be made against the subscriber at the end of each month.

GOOD ADVICE ABOUT TELEPHONING

On each of the telephones located in one of the largest commercial establishments in this country is a card, reading as follows:

"The manner in which a person uses a telephone indicates his character to a great extent, and makes either a good or bad impression. And this impression is reflected directly upon the establishment from which such message comes.

"It is a pleasure to do business with a house which performs EVERY DETAIL in a clean-cut, satisfactory manner; but it leaves a sting to be answered abruptly or discourteously over the telephone. It is a folly to lose one's temper because one does not get immediate connection. This is rarely ever the fault of the telephone operators, who are nearly always courteous and prompt

"When one is called to the telephone he should respond QUICKLY, and the person calling should not be left to hold the wire too long—something decidedly irritating and often un-

necessary

"Let us throughout the whole house strive to excel in satisfactory telephoning."

PROMOTING VS. OPERATING

THE TELEPHONE PROMOTER

cares nothing for the best interests of a city nor for the ultimate returns on the investment he promotes. He cares only to sell stocks and bonds, make a side profit on construction work, take his profits and get out, leaving the city with the burden, expense and nuisance of two telephones.

His personal, and therefore, controlling interests call for a large and expensive plant, rather than an efficient one; overcapitalization rather than honest financiering; large development rather than proper development; low rates to business houses—which he realizes must stand the cost of two telephones—rather than equitable or proper rates to all.

THE LEGITIMATE TELEPHONE COMPANY

on the other hand, is interested in the future as well as in the present condition of its plant and business, and therefore wants to decide every question which arises in the right way; it wants an efficient plant; it wants no waste, from duplication or otherwise; it wants to give good service in order to reduce the cost of canvassing, collecting and handling complaints; it wants reasonable rates in order to live. It believes in a unified local service in each town, regulated in the public interest.

Any Plan Founded on Error Must Fail

- THE WRONG PLAN. The plan of trying to secure good telephone service and low rates by means of the duplication of plants and consequent division of service, is one founded on error and therefore one that must fail, with ultimate loss both to the investors (not promotors) and to the Public.
- THE ERROR. The fundamental error in the case is indicated in the following statement, the truth of which can be easily demonstrated and is being rapidly learned by all existing telephone companies:

In any given city two telephone companies, competing for business over the same area, cannot afford to furnish even their limited service at any lower rates than can one single company afford to furnish complete service over the same area.

- THE RIGHT PLAN. In the light of reason and of experience, all errors should be avoided and right results secured by adopting the following plan:
 - 1. Make satisfactory service possible by connecting all subscribers in town to one system, by means of which every one can reach every one else.
 - 2. Make Low Rates Possible by avoiding all duplicate costs, all waste, all unproductive expenditures, all inflated capitalization.
 - 3. Make Fair Rates Satisfactory to all by giving each residence a complete service, and by relieving each business house of the extra expense for "both 'phones."
 - 4. Insure Fair Rates by means of public supervision of capitalization, expenditures and profits.
 - 5. Insure Good Service by public supervision, and by allowing the telephone company the necessary privileges and profitable or living rates without which no company can or ever has given continuous good service.

A TELEPHONE SYSTEM bears the same relation to the city it serves as the nervous system does to the human body—and there is no more reason for duplication in one case than in the other.

TWO telephone SYSTEMS IN ONE body EACH CONTROLLED BY

SEPARATE brain centers SURELY would REPRESENT A FREAK OF Nature Companies SURELY do REPRESENT A FREAK OF Finance

In a city which has but

ONE

telephone system, subscribers are able to communicate with

ALI

telephone users in the city.

To reach all you need but one system, and you pay the charges of but one company.

In a city which has

TWO

telephone systems, subscribers to either are able to communicate with only

A PART

of the telephone users in the city.

To reach all, you MUST have both systems, and MUST pay the charges of two companies.

TWO TELEPHONES CONNECTED TO ONE SYSTEM can and will carry more calls and give better service than two telephones connected to two separate systems. The increased efficiency of one system is very great, easily demonstrated, and WELL UNDERSTOOD BY TELEPHONE MEN.

TWO TELEPHONE COMPANIES IN ONE TOWN CANNOT give their customers, individually or collectively, as good service and as much service as a single company can; nor can they long continue to operate for less rates than a single company. Telephone duplication is therefore illogical, uneconomical and doomed to certain failure, to be sooner or later replaced by ONE UNIFIED AND REGULATED SYSTEM.

LITTLE group of men were sitting in the smoking room of a San Francisco hotel one night telling stories and discussing things generally. The conversation lagged for a brief moment, during which the faint but commanding tinkling of a telephone bell was heard.

Brown, a big, jolly fellow who represented a large manufacturing concern in a Southern city, listened to the distant ringing of the bell for a second, and then turned the conversation by saying:

"Bless'd if I see how we could do business nowadays without the long distance telephone. Got a call from the house this afternoon with a tip that starts me for Seattle first thing in the morning. Portland is usually my next stop.

That's so," chimed in another, "I used the long distance the other day when I was at Sacramento. I got a call to go back to San Francisco. Hadn't seen a half dozen of my upstate customers. So I called them on the telephone and took orders for over a thousand dollars' worth of goods. What did it cost?

Oh, the toll charges were only \$10.35, which was a small percentage on sales when you

"Well," said the veteran of the group, "I found the long distance telephone mighty useful when I was in a train wreck in Oregon last spring. The morning papers were full of the account of the wreck. I knew that my wife would be about worried to death until she knew I was safe. I got to a Bell telephone as quickly as I could, and you bet she was glad to hear my voice and to learn that I was

The Bell long distance makes a hit with me, said the man from Los Angeles. "When I made my last trip, we were expecting a new

arrival in our house, but I simply had to go. I was right here in this hotel when my brother Jim called me on the long distance and said: Congratulations, old man! It's a boy! Mother and child doing nicely. It was a big relief. I can tell you.

"Long distance call for James B. Smith!" cried a hotel page, approaching the group.

"Well, boys, I may have another telephone story to add to the collection," said Smith as he arose to answer the call.

"Which illustrates just what we were talking about," said the man from Los Angeles. "We seldom get beyond the reach of the Bell Long Distance Telephone Service.

-American Telephone & Telegraph Co.

Everybody Uses the Telephone Directory

If you want to become known

ADVERTISE

in the

TELEPHONE DIRECTORY

Which has obvious advantages over any other medium

IT GETS INSIDE the office door and into the home; it reaches the business man and housewife. Magazines and newspapers do this, but they are short lived. The Telephone Directory gets there and stays there—it is on duty constantly, day and night, every day in the year.

NO OBJECTIONABLE ADVERTISEMENTS WILL BE ACCEPTED

· For Particulars Call

SAN JOSE 185

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

TELEGRAMS

SENT BY TELEPHONE

TO THE

WESTERN UNION TELEGRAPH COMPANY'S OFFICE

Are placed upon the wires promptly, and given the same quick service as if filed at the Telegraph Company's Offices in the usual way.

Say to Central, "Telegram" or "Western Union"; the connection will be made immediately, and you may dictate your message to an expert operator.

The charges will be collected later.

OCEAN MAIL SERVICE, by which Telegrams (NIGHT LETTERS) are sent by wire to a prominent seaport, and from there mailed to a foreign address with only an additional five cent charge for postage, is a new and valuable facility, and a great benefit in communicating with people in foreign lands.

Western Union NIGHT LETTER SERVICE is unrivaled.

Bogus Collectors or Inspectors

¶All employees of the Company whose duties require them to enter the premises of its subscribers for any purpose whatever are supplied with credentials; and any subscriber having the slightest doubt as to the identity or the right of the person representing himself to be an employee of the Company should inspect the credentials.

¶¶Subscribers having Automatic Coin Boxes are requested TO BE PRESENT AT THE TIME THE BOX IS EMPTIED and to verify the contents before signing the certificate.

In placing calls for towns listed in this directory, subscribers will greatly facilitate the call by giving to the Operator the telephone number of the party wanted.

COLLECTION AGENCIES

WHAT'S YOUR TIME WORTH

If you answer \$1.00 per hour, I will tell you how to make \$10.00 in an hour. Spend one hour on your books, and send me a few accounts \$10 for you for collection, and if I do not make \$10 out of that hour's work, you will have \$10 worth of fun seeing how surprised I am.

The Telephone Directory as an Advertising Medium is particularly useful to concerns catering to Telephone Trade.

Telephone Directory Advertising

The Telephone Directory in any community is now so important as the list of business houses, prominent residents, etc., that the position it occupies in the business world is unique.

It is the only reference book kept up to date that is generally circulated, and of necessity is revised more often than any other local publication, and its circulation is usually much greater.

It is on duty constantly, day and night, every day in the year and reaches everybody.

It might surprise you yourself, for instance, to learn how much you rely on it as an address list and business guide.

Where do we usually see the telephone book!

Isn't it usually within a foot of the telephone? Isn't it often nailed there, in fact?

The telephone and the telephone book are inseparable, and if anybody takes one away from the other, there is an immediate protest.

These two modern conveniences are kept together because one must be used with the other. On this account, and owing to its continual use, the Telephone Directory, as an advertising medium, is invaluable.
